

QUALITY

By this test alone Douglas Park excels its compeers as a landscape by Michael Angelo would when placed alongside an amateur's drawing. Douglas Park bespeaks quality from any view—its location, its platting, its home makers, all are of the very highest class. Situated as it is on Thirteenth East between Eighth and Ninth South, overlooking the most delightfully located city in all America, the addition takes second place to none in the matter of location. Then its other advantages are multitudinous: Adjoining it on the west is the new \$600,000 high school now in course of construction; on the south is the new All Hallows college site; on the north, a block or so away, is the University of Utah; at the north-east, Fort Douglas, the grounds of which are soon to be made into a park of great magnitude and picturesqueness. Over the brow of the bench to the west, only a few rods away, the residence district of Salt Lake City is already built up and beautiful.

DOUGLAS PARK

Has graded streets, cement curbs, walks and gutters, a private park, streets laid on an artistic plan and every advantage such as street cars, electric lights, telephones, sewers and paved approaching roads. The American Woman's league clubhouse is to occupy a central position in the addition; in fact, first to last it is an addition of quality. Who is your neighbor?—Well, read this partial list of purchasers of lots in Douglas Park. We can show you a hundred more.

DOUGLAS PARK WEEKLY BULLETIN.

June 25, 1911.—The Equitable Life Assurance society of New York has agreed to make loans at 6 per cent on homes in Douglas Park, said loans to be paid back to the company under their new home-purchase plan. This lays all doubt aside as to the value of Douglas Park lots.

The six-inch water mains for Douglas Park have arrived and the eight-inch mains will be on the ground next week.
